FOR IMMEDIATE RELEASE:

**City and County of Denver Selects
Guaranteed Recycling Xperts (GRX) for Electronic Recycling**

Denver, CO March 16, 2009. Following extensive due diligence and inspection of companies who provide electronic recycling services, the City and County of Denver awarded its contract to Guaranteed Recycling Xperts (GRX). To ensure the contract was placed with a company that followed the highest standards of responsible recycling, Denver conducted a detailed audit of each company vying for the contract. The analysis consisted of visiting GRX facilities and examining each step of the collection, documentation, and de-manufacturing processes. The city also validated GRX's downstream partners and reviewed the company's environmental standards and awards.

Mike Wright, President of Guaranteed Recycling Xperts stated "E-waste recycling is a fairly new industry, so it is understandable that governments want to authenticate their suppliers are properly processing material in a manner that benefits the environment and ensures toxic materials are not dumped in developing countries." In addition to Denver, other cities including Loveland and Pueblo have awarded contracts to GRX after carefully researching responsible e-waste recyclers.

Benefits of GRX's contract with the City and County of Denver extend to other government agencies in the Denver metropolitan area. "Other government agencies and school districts can confidently piggy-back on this contract knowing the hard work of soliciting proposals and inspecting company operations was completed by the City and County of Denver," stated Mike Wright. GRX will help save taxpayer dollars by honoring the same contract rates provided to Denver for other regional government entities.

Denver maintains the Denver Recycles (www.denvergov.org/DenverRecycles) program which provides information on residential recycling collection service, special programs and information on waste reduction and recycling at home, work and school.

Guaranteed Recycling Xperts (www.grxrecycles.com) has been the leading electronic waste recycler in the Rocky Mountain region since 1999. GRX does not landfill or incinerate hazardous waste material and has signed the Basel Action Network's (BAN) Pledge of True Stewardship which provides the most rigorous set of environmental business standards for electronics recyclers. GRX recycles electronic waste from over 2,000 businesses and its high environmental standards diverted more than 10 million pounds of electronic waste from landfills in 2008. It recently won the CSIA Greenovation Award for environmental stewardship, and is part of the State of Colorado's Environmental Leadership Program. For additional information contact GRX, 4920 Washington Street, Denver, CO 80216. Phone 720.377.7700. www.grxrecycles.com.
