

FOR IMMEDIATE RELEASE

**Guaranteed Recycling Xperts (GRX) and Metech Merge
Operations for Coast-to-Coast Service**

April 2, 2009, Denver CO – Effective today, electronic waste recyclers Guaranteed Recycling Xperts (GRX) and Metech International merged the operations of their seven facilities. The combined organization provides electronic recycling, precious metal refining, and custom IT asset services for regional and nationally based clients. The merger means that GRX/Metech will be able to offer clients the largest network of electronics recycling services in the U.S. The company maintains recycling facilities in Gilroy CA, Denver CO, Colorado Springs CO, Clearfield UT, Omaha NE, Durham, NC and Worcester, MA.

“This merger will allow us to provide broader services in more locations and better serve our customers,” stated Sam Advani, President of Metech. The merged company will continue to use both company names for a transition period but is expected to operate under the Metech name by the end of the year. Metech’s 40-year history and expertise in custom asset management, precious metal refining and electronic recycling offers additional services to clients of both companies.

“We are installing a new processing unit in our Durham, NC facility that allows us to directly process cathode ray tubes (CRT’s) – one of the most difficult items to effectively recycle,” said Michael Wright who will serve as Senior Vice President. Having the internal capacity to recycle CRT’s in an environmentally safe and effective manner is critical to supporting the volume of e-waste processed in all seven locations. “Metech and GRX both have a history of commitment to maintaining the highest environmental standards. We now offer clients recycling solutions that maintain the highest environmental standards and offers nationwide reach. The combined company will provide improved logistics, more complete processing, better tracking and accountability, enhanced security, and customer service that are second to none,” stated Mr. Wright.

By merging GRX and Metech, the company is now capable of recycling 50,000 tons of e-waste per year. Electronics recycling is a rapidly growing industry and research estimates that electronic waste accounts for 70% of American’s toxic garbage and is growing exponentially. Both GRX and Metech are owned by Centillion Environment and Recycling Limited (“Centillion or “The Group”). Centillion is a fully integrated provider of recycling and processing services for electronic waste with presence in Europe and Asia.

Both companies seek to meet the highest environmental standards and all facilities are BAN certified. They signed the Basel Action Network’s (BAN) Pledge of True Stewardship which provides the most rigorous set of environmental business standards for electronics recyclers. Many of the facilities are ISO 9001 and ISO 14001 certified and all are expected to be by the end of the year or sooner.

About GRX and Metech International

Guaranteed Recycling Xperts is a leading responsible electronic waste recycler in the western U.S. and diverted more than 10 million pounds of electronic waste from landfills in 2008. It recently won the CSIA Greenovation Award for environmental stewardship and Silver Leadership award from Colorado Department of Public Health and Environment. www.grxrecycles.com.

Metech International is a pioneer in asset reuse and precious metal recovery, and specializes in environmentally responsible, accountable recycling and reuse of industrial manufacturing scrap, obsolete inventory, and end-of-life electronics. www.metechrecycling.com.
