FOR IMMEDIATE RELEASE

Chris Ryan Named President of Metech Recycling

Worcester, MA - Metech Recycling announces that Chris Ryan assumed the role of President earlier this year. Ryan now leads one of the largest electronics recycling Companies in the U.S., with recycling facilities located in six states including Massachusetts, North Carolina, Nebraska, Colorado, Utah, and California. Combined, these facilities have the capacity to process 50,000 tons of e-waste annually. Metech Recycling was formed in 2009 as a result of the merger of Metech International and Guaranteed Recycling Xperts (GRX) of Colorado. The merger has allowed the company to broaden its service capabilities, significantly expand its U.S. footprint, and provide high quality e-waste recycling services to a broader customer base.

Mr. Ryan originally joined Metech in 1998 as a member of the company's sales team, and was primarily responsible for developing Metech's e-waste recycling business. Following the merger with GRX, Ryan not only led the East Coast sales team but also oversaw facility operations in Massachusetts. Ryan has over 30 years of experience as an engineer in the alternative energy systems, waste-to-energy, plastics, and electronics recycling industries. He holds a Bachelor's degree in Mechanical Engineering from the University of Massachusetts in Amherst.

"It is exciting to lead an organization of highly qualified people who are so dedicated to providing high quality service to our customers," said Ryan. "As the e-scrap recycling industry becomes more widely accepted in the eyes of corporate America and the general public, I am committed to seeing that Metech Recycling remains an industry leader. Our professional services meet the highest standards for environmental, health, and safety practices."

Metech Recycling (www.metechrecycling.com) operates seven facilities nationwide and is a leading electronics waste recycler. Metech Recycling is a Founding Member and Pledged e-Steward of the Basel Action Network (BAN), and is in the process of becoming certified under the e-Steward standard. Nearly all materials collected and de-manufactured by Metech Recycling are fully recycled. No recyclable materials are incinerated, landfilled, or shipped abroad to be dumped. Metech Recycling provides complete materials processing and documentation of data device destruction at its facilities. Metech Recycling is owned by Centillion Environmental and Recycling Limited based in Singapore. Centillion is a fully integrated provider of recycling and precious metals processing services for electronic waste with a presence in the US, Europe, and Asia.
